

You need:

- ☆ Playing cards (use ♥, ♠, cards 1 to 10)
- ☆ Calculator
- ☆ Pen and paper

1. Choose who is Player A and Player B.
2. Shuffle the ♥ cards and place them face down on the table. Shuffle the ♠ cards and place them face down on the table.

3. Player A turns over the top card from each pack and multiplies the two numbers. Player B checks the answer using a calculator.

$$3 \times 2 = 6$$

4. If Player A is wrong, they score a point.

5. Player B turns over the next card from each pack and multiplies the two numbers. Player A checks the answer using a calculator.

$$6 \times 9 = 54$$

6. If Player B is wrong, they score a point.
7. When all the cards are used up, the players add up their scores. The player with the lowest score wins.
