

You need:

- ✧ 4 dice
- ✧ Plastic cup
- ✧ Timer
- ✧ Calculator
- ✧ Pen and paper

1. Choose who will be Player A and who will be Player B. Set the timer for 10 minutes.
2. Player A places the 4 dice in the plastic cup, shakes the cup and rolls the dice.
3. Player A places the 4 dice into 2 pairs. Use a calculator to multiply each pair of numbers and write the 2 products.
4. Player A subtracts the smaller number from the larger number. The total is their score.

5. Player B then rolls the dice, places the 4 dice into 2 pairs and uses a calculator to multiply each pair of numbers. Write down the 2 products. Player B subtracts the smaller number from the larger number. The total is their score.
6. The game continues with players taking turns to roll the dice. When the timer rings, Player B finishes their turn.
7. Both players total their score. The player with the lowest score wins.
