

You need:

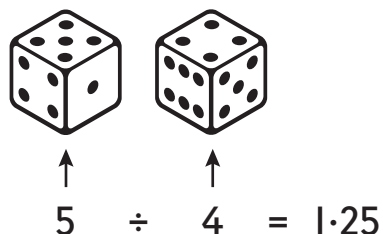

- ☆ 2 dice
- ☆ Calculator
- ☆ Pen and paper

1. Roll one dice and then the other. Use a calculator to divide the first number by the second number. Write down the answer with the remainder as a decimal fraction.

2. Use a calculator to divide the second number by the first number. Write down the answer with the remainder as a decimal fraction.

3. Do this 10 times.
4. Use a calculator to add up your 20 scores to get your game score.
5. Play the game lots of times. Write down your game score each time.

What is your highest game score?
