

## You need

- ☆ Playing cards (use A cards and cards 2 to 10. A = 1)
- ☆ Timer

1. Choose who is Player A and who is Player B. Shuffle the cards. Each player takes 20 cards.

2. Set the timer to 5 minutes.

3. Player A puts a card on the table, like this:

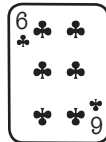

4. Player B puts a card on the other side of the table, like this:

5. Players take it in turns to put another next to their first.

6. Players add up 2 or 3 cards as they play to see if they make the number on another card, like this:

$$2 + 4 = 6$$

The player says 'snap!' and writes down the score.

7. The player with the highest total, when the timer rings, is the winner.
