

You need:

- ✧ 2 dice
- ✧ Calculator
- ✧ Pen and paper

1. Roll the two dice. Divide the larger number by the smaller number and write down the answer using fractions.
2. Use a calculator to express the answer as a decimal.

$$5 \div 4 = 1\frac{1}{4} = 1.25$$

3. Do this 10 times.
4. Use a calculator to add up your 10 scores to get your game score.
5. Play the game lots of times. Write down your game score each time.

What is your highest game score?
